INTRODUCTION

Welcome to the Department of Speech and Hearing Science (SHS) at Arizona State University (ASU) and to the graduate program in audiology. The Doctor of Audiology (AuD) degree program at ASU is based on a research-to-practice philosophy and is designed to prepare audiologists for autonomous clinical practice. The clinical doctorate model at ASU stresses the integration of academic classroom learning and practical experience across a broad spectrum of clinical specialties and practice environments. We believe that our AuD curriculum provides a strong foundation in the scientific knowledge base and a wide range of clinical field experiences that should prepare AuD graduates with the tools necessary for evidence-based clinical practice. The successful AuD candidate will have the diagnostic and rehabilitative skills necessary to fulfill the current Scope of Practice in Audiology specified by the American Speech-Language-Hearing Association (ASHA). The ASU AuD curriculum also is designed to enable AuD students to meet current standards required for ASHA certification in Audiology as well as Arizona state licensure standards.

The purpose of this handbook is to provide AuD students with the basic information needed throughout their course of study and to assist students in navigating their way through the graduate degree program and certification process. This Handbook and the Audiology Clinic Manual are the primary resources of information regarding policies, regulations, and academic and clinical requirements, which must be met to satisfactorily complete the AuD degree, state licensure, and ASHA certification. This Handbook is not meant to be an exhaustive collection of all policies at Arizona State University. Students also should review the ASU Graduate Policies and Procedures (https://graduate.asu.edu/policies-procedures), which is the final source regarding University policies on graduate programs. Some of the information provided in the Handbook also is available on the Department’s AuD website (https://chs.asu.edu/audiology-aud). If additional questions and concerns arise that are not formally addressed in these sources, your program advisor will be a valuable asset as you progress through the program. You are urged to maintain close contact with your advisor and to seek additional information as the need arises. Academic and clinical faculty members also are available for advice, guidance, and consultation regarding all academic and clinical requirements, policies, and procedures. It is however, the responsibility of AuD students to be informed about all academic and clinical requirements of the AuD program at ASU.

ARIZONA STATE UNIVERSITY

Arizona State University (ASU), in central Arizona’s Valley of the Sun, is one of the premier metropolitan public research universities in the nation. Its enrollment of approximately 70,000 students ranks Arizona State as the largest of America’s institutions of higher learning. ASU’s reputation as a center of teaching and research is growing at pace with its student body, faculty, and academic programs. ASU is accredited by the North Central Association of Colleges and Secondary Schools and was named to Research Extensive (formerly Research I) status in 1994, recognizing ASU as a premier research institution. Arizona State University’s Tempe campus of 580 acres is located in Tempe, a historic city of approximately 160,000 in the fast-growing metropolitan Phoenix complex, which has a population of over 1,500,000. The University, therefore, has the dual advantages of location in a moderate-sized city and proximity to all the resources of a metropolitan center. ASU is research-driven but focused on learning; -teaching is carried out in a context that encourages the creation of new knowledge. ASU offers outstanding resources for study and research, including libraries and museums with important collections, studios, and performing arts spaces for creative endeavor, and unsurpassed state-of-the-art scientific and technological laboratories, and research facilities. The faculty includes recipients of prestigious academic and professional awards, including membership in the national academies. ASU currently ranks high among public universities nationwide in its enrollment of freshmen merit scholars. The AuD program at ASU is ranked 17th in the nation in the 2012 US News and World Report Rankings. The university champions diversity and is international in its scope, welcoming students from all 50 states and nations across the globe.
Currently, the Department of Speech and Hearing Science has an enrollment of approximately 390 undergraduate majors, 135 graduate students, 26 full-time faculty, 18 adjunct faculty, and over 30 community professionals who participate in various aspects of our academic and/or clinical training programs. The Department offers a broad academic curriculum, comprehensive clinical experiences, and active research programs in a variety of areas.

ACADEMIC FACULTY AND AREAS OF EXPERTISE

Tamiko Azuma, Ph.D., Associate Professor, Arizona State University. Language, particularly semantic processing, and memory impairments underlying communication disorders in normal aging, stroke, Alzheimer’s disease, and Parkinson disease.

Visar Berisha, Ph.D., Assistant Professor, Arizona State University. Dysarthric speech signal processing, automatic intelligibility assessment, psychoacoustics, computational models of human auditory cognition, statistical signal processing, data mining, machine learning, bandwidth extension of speech.

Michael Dorman, Ph.D., Professor, University of Connecticut. Speech perception; cochlear implants; neural plasticity in children.

Shelley Gray, Ph.D., Professor, University of Arizona. Child language development and disorders; early literacy assessment and intervention; lexical acquisition and treatment in young children with specific language impairment.

David Ingram, Ph.D., Professor, Stanford University. Linguistics; childhood language acquisition; normal and disordered phonological development; bilingual language acquisition.

Julie Liss, Professor, Ph.D., University of Wisconsin-Madison. Motor speech disorders; perception of dysarthric speech; dysphagia; neurological basis of communication.

Nancy Scherer, Ph.D., Professor and Department Chair, University of Washington. Children with cleft palate and velo-cardio-facial syndrome.

Beate Peter, Ph.D., Assistant Professor, University of Washington. Molecular genetics; genetic etiologies of speech sounds disorders; biomarkers of dyslexia; early intervention.

Andrea Pittman, Ph.D., Associate Professor, University of Wisconsin-Madison. Pediatric audiology; amplification; speech perception.

Adelaida Restrepo, Ph.D., Professor, University of Arizona. Language assessment and intervention in bilingual and Spanish-speaking children; literacy development and intervention in Latino children; specific language impairment in Spanish-speaking and bilingual children.

Corianne Rogalsky, Ph.D., Assistant Professor, University of California Irvine. Aphasia; speech processing, functional magnetic resonance imaging.

William Yost, Ph.D., Research Professor, (Retired) Indiana University. Auditory perception involving pitch, temporal modulation, and localization of sound sources especially in reverberant space; environmental noise; and computational models of hearing.

Yi Zhou, Ph.D., Assistant Professor, Boston University. Auditory Neuroscience, study of the central auditory nervous system, especially auditory cortex.

Xin Luo, Ph.D., Assistant Professor, University of Science and Technology of China. Basic mechanisms of pitch perception in both acoustic and electric hearing, and using such knowledge to develop novel sound processing strategies that can enhance speech and music perception for cochlear implant users.

CLINICAL FACULTY AND AREAS OF EXPERTISE

Amy Ariss, Au.D., M.BA., Clinical Associate Professor, Rush University, WP Carey School of Business. Vestibular disorders, diagnostics, and practice management.

Catherine Bacon, M.A., Clinical Associate Professor, University of Minnesota. Early intervention; assessment in naturalistic settings; early childhood speech-language development and intervention.
Jean Brown, Ph.D., Clinical Associate Professor, Arizona State University. Classroom-based preschool communication programming; family-centered early intervention services; multi-cultural concerns and issues.

Jacqueline Busen, Au.D., Clinical Assistant Professor, Rush University. Cochlear Implants; Amplification I.

Dawn Cosgrove Greer, M.A., Clinical Associate Professor, University of Kansas. Early language and communication development; early intervention strategies; family training/education.

Maria Dixon, M.A., Clinical Associate Professor, University of Maryland. Bilingual Speech-Language Pathology; Social interaction in adolescents.

Kelly Ingram, M.S., Clinical Associate Professor, Director of Speech and language Clinic. Purdue University. Neurogenic communication disorders in children and adults; normal and disordered phonology; speech disorders.

Ingrid McBride, Au.D., Clinical Professor, Director of Audiology Clinic. University of Florida. Advanced technology hearing aids; assistive technology for the hard-of-hearing and deaf; audiological rehabilitation; diagnostic audiology; physiological measures.

Aparna Rao, PhD., Clinical Associate Professor, Purdue University. Advanced audiometry; hearing conservation; instrumentation.

Karen Pittenger, M.S., Clinical Associate Professor, University of Washington. Neurogenic communication disorders in children and adults; language and literacy disorders in adolescents and adults; feeding and swallowing.

Kathleen Peterson, Au.D., Clinical Assistant Professor, A. T. Still University Diagnostic and medical audiology, cochlear Implants, aural rehabilitation.

Denise Stats-Caldwell, M.A., Clinical Associate Professor, Western Washington University. Voice, swallowing, head and neck cancer, motor-speech and neurogenic communication disorders in adults.

Juliet Weinhold, Ph.D., Clinical Assistant Professor, University of Zurich. Linguistics; late-acquired speech sound disorders; orofacial myofunctional disorders; lexical acquisition; code-switching in bilingual children.

Kathryn Wexler, Au.D., Clinical Associate Professor, Salus University (formerly Pennsylvania School of Optometry). Pediatric audiology; advanced technology hearing aids; evoked potentials; aural rehabilitation.

Erica Williams, AuD/PhD, Clinical Associate Professor, Arizona State University. Auditory Pathologies and Otoneurologic Applications; Physiological measures of auditory function.

ADJUNCT FACULTY AND AREAS OF EXPERTISE

Stephanie A. Borrie, PhD Speech and Language Therapy, University of Canterbury, Christchurch, New Zealand. Assistant Professor, Utah State University.

Michael Cevette, Ph.D., Director of Audiology, Mayo Clinic, Scottsdale. Auditory brainstem response, neonatal hearing evaluation and intervention.

Laurie Davis, AuD., Audiologist, Mayo Clinic, Scottsdale.

Rene Gifford, Ph.D., Associate Professor at Vanderbilt Kenney Center and Director of the Cochlear Implant Program.

Sarah Holbert (Oakley), AuD., Department of Otolaryngology, Mayo Clinic Arizona. Cochlear implants.

Donna Jackson-Maldonado, PhD Hispanic Linguistics, El Colegio de Mexico. Professor, Universidad Autónoma de Querétaro, Mexico.

Line Joergensen, MA Language Pathology, University of Copenhagen.

Deborah Leach, MA Speech Pathology, California State University Los Angeles. Barrow Cleft and Craniofacial Center.
Michael Marzalek, MS., Electrical Engineering. Enhancements of existing cochlear implant designs through psychoacoustic experimentation, processing and stimulation strategies.

Lynne Remson, PhD Education (Language and Literacy), Arizona State University. Speech Language Pathologist, The Nicholls Group, Scottsdale.

Wayne Staab, Ph.D., Hearing and Speech Sciences. Hearing amplification.

Inge Trindade, PhD Respiratory Physiology, Universidade de Sao Paulo, Brazil.

Jeanne Wilcox, PhD Communication Sciences and Disorders, University of Memphis. Professor, Mary Lou Fulton Teachers College, Arizona State University. Early childhood development and interventions.

Richard Wilson, PhD Audiology, Northwestern University. Senior Research Career Scientist, Phoenix VA Healthcare System.

Leopold Yin, M.D., Otolaryngology. Valley ENT, Mesa. Fellowship trained in Laryngology and Care of the Professional Voice, Vanderbilt University. Voice disorders, pediatric ENT, and sinus disease.

AMERICAN SIGN LANGUAGE FACULTY
(These faculty members are not eligible to serve on graduate committees.)

Pamela Howard, M.A., Lecturer, Linguistics-ESL, California State University, Fresno. American Sign Language; Deaf culture.

Dyan Kovacs, M.A., Lecturer, Sign Language Teaching, Gallaudet University. American Sign Language; Deaf culture.

Paul Quinn, B.A., Lecturer/ASL Program Coordinator, Deaf Studies, California State University, Northridge. American Sign Language; Deaf culture.

Julie Stylinski, M.A., Lecturer, Education, University of Phoenix. American Sign Language; Deaf culture.

ADMINISTRATIVE STAFF

Jenna Roelle, Administrative Assistant
Lucy Wolski, Department Coordinator
Tracey Schnick, Manager of Business Services

GRADUATE STUDIES POLICIES AND GENERAL INFORMATION

Please visit the ASU Graduate Education web site at https://graduate.asu.edu/policies-procedures for updated and most current Graduate policies.

ADMISSIONS STATUS

Students are admitted to Graduate Education of Arizona State University with regular, deficiency, or provisional classification (unclassified students have not been admitted to a degree program by the Office of Graduate Education). Students admitted with regular status are considered to be prepared to begin graduate training. Students admitted with deficiency status are expected to complete certain undergraduate courses prior to beginning the graduate curriculum (see section on Undergraduate Deficiency Coursework). Students admitted
with provisional status are expected to complete courses during the graduate program while maintaining expected GPA. The terms of the provisional status are outlined on the letter of admission.

Only full-time students are accepted to the AuD program at ASU. The program is residential and all students must begin the program in the Fall semester.

AUTOMATIC WITHDRAWAL

A graduate student who does not enroll at any point during one calendar year (Fall/Spring/Summer semesters) is automatically withdrawn from the program. According to current policy, doctoral students who find it necessary to suspend their graduate studies may request a Leave of Absence not to exceed two consecutive semesters, including summer. The form required to petition the Graduate School for a leave of absence is available on the Graduate College web site at: http://graduate.asu.edu/current_students.

TRANSFER CREDIT POLICIES

Transfer of Academic Courses
The ASU Graduate Policies contain a description of Transfer (or Pre-Admission) Credit Policy. Students who completed graduate level courses as a student with non-degree status at ASU prior to admission to the degree program may transfer a maximum of nine (9) semester hours to the degree program if they meet the criteria specified below (see the current ASU Graduate Policies at: https://graduate.asu.edu/policies-procedures). The taking of courses for graduate credit as an undergraduate or non-degree student does not ensure admission to the graduate program or acceptance of the acquired graduate credits as a part of the program of study.

Department regulations for transfer of academic credits stipulate that a maximum of twelve (12) hours of appropriate, graduate level coursework undertaken at another university, and not previously counted towards any other degree can be transferred towards the AuD program of study. Departmental regulations for transfer of academic courses stipulate that a transfer of credits from another institution for graduate credit may be allowed under the following conditions:

1. The student must have taken the courses at an accredited college or university.
2. The courses that will be transferred must be graduate level courses.
3. The student must have obtained a grade of B- or better (or equivalent) in the courses transferred.
4. The student’s program advisor or the Audiology Admissions and Program committee must approve these transferred courses as part of the student’s Program of Study.

Transfer of Clinical Clock Hours
Students must complete a minimum of 1820 clock hours of supervised clinical experience in order to receive a Doctor of Audiology Degree at Arizona State University. Students may transfer up to a maximum of 150 of the minimum 1820 practicum clock hours. In order to transfer practicum clock hours from another college or university:

1. Students must submit a record of the clock hours signed by the supervisor to the Director of the Audiology Clinic.
2. The supervisor(s) must have held the applicable Certificate of Clinical Competence in speech-language pathology or audiology from the American Speech Language Hearing Association.
3. The supervisor must have provided supervision during 25% of the student’s therapy hours and 50% of the diagnostic hours.
4. Students must have received a grade of B- or better if letter grades were assigned or a pass if the experience was graded pass/fail.
**Time Limits**

Because it will take approximately four years to complete the sequence of academic and clinical requirements and the Office of Graduate Education College regulations stipulate that all requirements must be met within a consecutive ten-year period, transfer credits are subject to time limits. Transfer courses taken more than two years prior to admission to the AuD program are not eligible for transfer. Although exceptions are occasionally made, they are rare, and in most cases students are required to observe the six-year time limit.

**FINANCIAL ASSISTANCE**

The number of graduate students provided with financial support varies from semester to semester depending on state and federal appropriations. Financial support, which is offered on a competitive basis, consists of tuition scholarships assistantships (graduate teaching, research, clinical), and Veterans Affairs traineeships. All students are considered for financial assistance at the time of their admission and throughout the program. Appointments are merit based (academic performance). There are also a number of options for financial assistance for graduate study through the Office of Graduate Education, including scholarships, fellowships, assistantships, student loans, and work-study. More information can be found at [https://graduate.asu.edu/pay-for-college](https://graduate.asu.edu/pay-for-college). Graduate students seeking financial aid counseling may contact the main Student Financial Aid office on the Tempe campus, Student Services Building, 2nd Floor, call 855-278-5080, submit a case via the MyASU Service tab, or visit the financial aid website at: [http://students.asu.edu/financialaid](http://students.asu.edu/financialaid).

**Teaching, Research, and Clinical Assistants**

The specific duties of teaching, research, and clinical assistants vary depending on the Department needs each semester. Students with special skills should provide an up-to-date resume for their student file. These resumes are reviewed when selecting students for specific positions. Examples of duties performed by teaching, research, and clinical assistants are listed below.

**Teaching Assistants - University/College Funding:**

1. Preparation of materials for classroom presentations.
2. Giving, monitoring, and grading examinations.
3. Classroom demonstrations and presentations.
4. Teaching laboratory sections.
5. Library research.
6. Holding office hours for students.
7. Review sessions for course material and exams.

**Research Assistants - Grant Funding:**

1. Setting up and maintaining equipment and instruments used in experiments.
2. Running subjects and collecting data.
3. Transcription and data coding.
4. Statistical treatment of data.
5. Preparation of materials for presentations, manuscripts, and grant proposals.

**Hearing Aid Technician - University, College, Clinic Funds:**

1. Managing the walk-in clinic for care-needed-today appointments.
3. Maintaining clinic rooms, equipment, and audiology instruments.
4. Updating clinic software on all clinic computers.
5. Processing hearing aid repairs and new orders, including electroacoustic analysis.
6. Monitoring and performing data entry into the clinic’s information management system and electronic medical record document upload.
UNDERGRADUATE DEFICIENCY COURSEWORK

Students admitted to the AuD program who have an undergraduate degree in another discipline will be required to complete all courses listed in Table 1. In some cases, the admissions committee or the advisor may determine that a student with an undergraduate degree in speech and hearing science has insufficient basic science preparation for graduate level professional coursework. For these students, selected courses will be required. Students will be notified of possible deficiency requirements in their admission letter with specific requirements to be determined through review by the audiology admissions committee. Although these courses are undergraduate in nature, students should register for courses at a graduate level, if offered, and should expect additional requirements for successful completion of the courses. The student is expected to maintain a minimum 3.0 grade point average throughout the AuD program, including deficiency courses, with a minimum grade of B-.

These courses (or equivalents) are offered at most undergraduate institutions offering a degree in speech and hearing science (or communicative disorders). They also are offered at ASU.

1Graduate students requiring leveling courses should enroll in the 500-level section if available.

ASHA Scientific and Research Foundations of the Profession: In addition, students admitted to the AuD program should also have met the scientific and research foundations of the profession required for ASHA certification (listed in Table 2). If these requirements were not met during undergraduate coursework, the student must complete these requirements during their four-year AuD program, which may prolong their program of study.

PROGRAM OF STUDY FOR THE DOCTOR OF AUDIOLOGY (AuD) DEGREE

The Doctoral Program in Clinical Audiology is a full-time program for post-baccalaureate students extending over a period of 45 months, including four fall and four spring semesters, and three summer sessions. The four-year course of study for the AuD degree is comprised of basic science coursework, professional knowledge coursework, and clinical practicum experiences. The curriculum is designed such that upon completion students will have satisfied all academic and clinical requirements necessary for clinical certification in audiology (CCC-A) by ASHA. The goal of the curriculum is to assure the acquisition of knowledge and skills at the completion of each phase of the educational program. Satisfactory completion of all requirements for ASHA certification will be determined by
outcome-based formative and summative assessments completed throughout the degree program. The AuD program requires 95 semester credit hours, of which 57 are required academic credits provided through the Department of Speech and Hearing Science, 6 are required academic credits for elective courses provided through departments within Arizona State University, and 32 are required clinical credits. Full-time commitment is critical because graduate courses are offered only once per academic year. In addition, course content and the sequence of courses are closely tied to clinical practicum assignments. Moreover, full-time enrollment assures timely completion of the program. A typical four-year course sequence for students entering the AuD program is shown in Appendix A. All graduate students are expected to maintain a 3.0 grade point average throughout their program of study in order to graduate from the AuD Program. It is the responsibility of all graduate students to be familiar with the Academic and Clinical Standards for the Department of Speech and Hearing Science. https://shs.asu.edu/pg-info

ADVISING

A program advisor is assigned to each AuD student before the start of the first fall semester. Students should meet with their program advisor during orientation to discuss their plan of study. The primary role of the program advisor is to advise the student in matters pertaining to the program of study and to monitor the student’s progress in the attainment of specific knowledge and skills and the completion of all academic and clinical requirements during the program of study. To assure that your academic program runs smoothly, plan to consult with your program advisor prior to registration for classes during each semester of your enrollment.

STUDENT COMPLAINT PROCEDURES

Students with grievances regarding another student or an instructor are encouraged to discuss the grievance with the other party prior to involving their program advisor. If the situation warrants a formal response, the program adviser will determine an appropriate course of action. If the student has a complaint against their program adviser, the student should take the complaint to the Chairperson of the Audiology Admissions and Program Committee or to the Chairperson of the Department of Speech and Hearing Science, each of whom in consultation with the other or independently will take steps to resolve the issue. If the situation is not resolved in a satisfactory manner, the student can submit a complaint to the Graduate School or to the University appointed Ombudsperson (an impartial fact-finder and problem-solver) for Academic and Student Affairs. The Ombudsperson has no power to reverse or change decisions but has conciliation skills to help expedite the process. More information about Ombudspersons and the Ombudspersons Committee can be found at: http://provost.asu.edu/committees/oc

Complaints about the AuD Graduate Program at ASU also may be submitted in writing to:

Chair, Council on Academic Accreditation in Audiology and Speech-Language Pathology
American Speech-Language-Hearing Association
2200 Research Boulevard, #310
Rockville, MD 20850

The information regarding how complaints are reported and handled can be found at: http://www.asha.org/academic/accreditation/accredmanual/section8.htm

GRADUATE COURSE AND CLINIC REQUIREMENTS (CREDITS)

Academic Coursework:
500: Research Methods (3)
502: Basic Audiometry (4)
504: Amplification I (4)
505: Survival Sign Language (2)*
508: Pediatric Audiology (3)
510: Amplification II (3)
511: Auditory Perception by the Hearing Impaired (3)
513: Neurophysiology of the Auditory System (3)
516: Auditory Evoked Potentials (3)
517: Balance Assessment (3)
518: Auditory Rehabilitation (3)
519: Advanced Audiology (3)
520: Auditory Pathologies/Disorders and Otoneurologic Applications (4)
522: Hearing Conservation/Instrumentation (3)
524: Counseling in Communication Disorders (2)*
525: Audiology Practice Management (3)
526: Launch to Clinic (1)
552: Physiological Measures of Auditory Function (3)
555: Cochlear Implants (3)
589: Audiology Grand Rounds (1 credit year one; 1 credit year two) (2)
Electives (2 courses of 3 credits each, clinical rotation, research, or mentored teaching (see below)) (6)

*offered during the summer

Clinical Rotations:
580: Clinical Practicum 1 (2)
580: Clinical Practicum 2 (2)
580: Clinical Practicum 3 (3)
584: Clinical Internship 2 (3)
584: Clinical Internship 2 (3)
584: Clinical Internship 3 (3)
590: Audiology Clerkship (15)

Academic Credits: 63
Clinical Practice Credits: 32
Total Program Credits (Academic & Clinical): 95

OPTIONAL MENTORED RESEARCH EXPERIENCE (ELECTIVE)

Students in good standing in the AuD program may fulfill their required electives by engaging in research either during the summer semester of their second year or during their third year in the AuD program for one or two semesters. Students who elect this option shall register for SHS 592: Research. Three levels (Tiers) of research are available to accommodate a range of projects. Interested students must meet with a research mentor to discuss the research options and then complete the AuD Research Mentor Agreement (See Appendix B) prior to beginning a project. This form makes clear the student’s and mentor’s responsibilities during the project and the criterion by which the student will be evaluated. The research experience will be developed around the student’s interests, student’s background, and ongoing auditory research at the University. The SHS 592 registration shall be for a minimum of 1 credit each semester and must be approved by the director (faculty or principle investigator) of the research program in which the student elects to participate. Descriptions of the department’s research laboratories are available on the Department web site at http://shs.asu.edu/shs/research. It is the student’s responsibility to contact and meet with the program director (faculty) prior to the start of the third year. Some faculty may require a directed reading prior to beginning the research to determine the student’s area and level of interest.
OPTIONAL MENTORED TEACHING EXPERIENCE (ELECTIVE)

Students in good standing in the AuD program may fulfill the required elective for the Spring semester of their third year by engaging in a comprehensive mentored teaching experience. This option is for one semester only and is available to students who have experience as an instructor, lecturer, and/or teaching assistant. Students without prior teaching experience are not eligible. Interested students must meet with the mentor of their choice to discuss the possibility of a mentored teaching experience. The student should enroll in 3 credits of SHS 591 per semester and expect to spend approximately 10 hours per week engaged in the teaching workload plus 10 hours of preparation time. If both parties agree, the AuD Teaching Mentor Agreement Form (See Appendix C) must be completed prior to the start of the semester. This form specifies the student’s and mentor’s responsibilities during the semester and the criterion by which the student will be evaluated. Appendix C outlines the courses that the student can choose for the mentored teaching experience.

GRADUATION REQUIREMENTS

- Successful completion of 63 semester credit hours of required academic coursework
- Successful completion of 32 semester credit hours of clinical experiences
- A grade of B- or better for all academic courses and clinical experiences

ACADEMIC STANDARDS

The following is a summary of the academic and clinical standards to which all students must adhere. A full description of the standards can be found on the SHS Student Resources Blackboard site. The standards posted on the Blackboard site are revised and updated regularly and supersede those described below if necessary. It is the responsibility of all graduate students to be familiar with the current Academic and Clinical Standards.

- To demonstrate satisfactory performance, graduate students pursuing the AuD degree will be expected to:
  - Maintain a 3.0 or higher grade point average each semester.
  - Earn no more than one unsatisfactory grade during their entire program [i.e., a grade worse than B- in an academic course or in a clinical practicum, or withdraw from a course while failing (grade of W/E)].
  - A single instance of a grade worse than B- in an academic course is permissible, but that grade may not be included on the Program of Study. For that course to be included, the student must retake the course and earn a grade of B- or better.
  - Receive no more than one incomplete in a given semester.

- Students will be dismissed from the program:
  - Following two instances of unsatisfactory academic performance, regardless of the semester in which the poor performance occurred.
  - For a single instance of academic dishonesty.
  - For seriously compromising the relations of the Department with the public.
  - For breaches of ethical judgment or professional responsibility.
  - For serious instances of personality or character traits inappropriate for the professional roles for which the student is attempting to prepare.

- Following the first, single instance of unsatisfactory performance (unsatisfactory grade or more than one Incomplete in a given semester), the student:
o Must meet with his/her program advisor to revise the Program of Study to include the repeated course.
o Meet with his/her program advisor each semester thereafter to review progress.
o Must notify the advisor, in writing, of any changes he/she wishes to make to the Program of Study (including withdrawal of enrollment from a course).
o Must earn a B- or better in the academic course in which an unsatisfactory grade was earned.
o Must earn a satisfactory grade in the practicum in which the unsatisfactory grade or incomplete was earned.
o Must earn a B- or better in the academic course in which the incomplete was obtained by the end of the following academic semester.

AUD COURSES WITH COURSE DESCRIPTION

(Also see Department web site at: https://chs.asu.edu/shs/and the SHS Student Resources Blackboard site for other graduate and undergraduate courses offered in the Department)

SHS 500 Research Methods. (3 credits) This course is a survey of research methods in areas related to speech, language, and hearing. The overall goal of this course is to cultivate an understanding of the scientific method through readings, activities, lectures, and discussions. Topics include the scientific method, the basics of designing and conducting research, theoretical development, data analysis, and interpretation of results.

SHS 502 Basic Audiometry (4 credits) This course covers the bases, purposes, rationales, and procedures for the core clinical tests of auditory function in adults and children.

SHS 504 Amplification I (4 credits) Operation, electroacoustic measurement, selection and prescriptive fitting of amplification devices.

SHS 505 Survival Sign Language (2 credits) This course is designed to facilitate effective manual and alternative methods of communication with deaf individuals in clinical settings.

SHS 508 Pediatric Audiology (3 credits) This course emphasizes the principles and procedures for early identification and management of congenital and early-onset hearing loss.

SHS 510 Amplification II (3 credits) Verification and validation of hearing aid performance, benefit and satisfaction. Fitting considerations for pediatric and geriatric populations. Assistive technology.

SHS 511 Auditory Perception by the Hearing Impaired (3 credits) Psychophysical methods and behavioral aspects of hearing with an emphasis on the perceptual consequences of sensorineural hearing loss.

SHS 513 Neurophysiology of the Auditory System (3 credits) This course focuses on the neurophysiology of the normal auditory system and on changes associated with hearing loss.

SHS 516 Auditory Evoked Potentials (3 credits) Electrophysiologic assessment of the peripheral and central auditory nervous system.

SHS 517 Balance Assessment (3 credits) Clinical analysis and treatment of balance disorders and dizziness.

SHS 518 Auditory Rehabilitation (3 credits) Study and clinical application of assistive technology and rehabilitative services for managing the effects of hearing impairment.

SHS 523 Advanced Audiometry (3 credits) This course covers advanced procedures in diagnostic audiometry in both adults and children.

SHS 520 Auditory Pathologies and Disorders / Otoneurologic Applications (4 credits) This course familiarizes students with major diseases, pathologies, and disorders of the human auditory system as well as advanced otologic, neurologic, and audiologic approaches in the differential diagnosis of peripheral and central disorders.
SHS 522 Hearing Conservation/Instrumentation (3 credits) This course examines the prevention, identification, physiological effects, and management of hearing loss due to noise exposure.

SHS 524 Counseling in Communication Disorders (2 credits) Theories of counseling emphasizing the psychosocial and emotional impact and the management of individuals with hearing loss and their families.

SHS 525 Audiology Practice Management (3 credits) Business practice issues, quality assurance and professional ethics for the practicing audiologist.

SHS 526 Launch to Clinic (1 credit) In Launch-to-Clinic, students rotate through on-campus observations and group orientation to the ASU Speech and Hearing Clinic. Students learn the policies and procedures of the ASU Speech and Hearing Clinic, software specific to clinic operations, report writing, and clinical documentation with practice to develop the skills needed to succeed in subsequent clinical rotations both on and off campus.

SHS 552 Physiological Measures of Auditory Function (3 credits) This course focuses on the measurement of otoacoustic emissions and acoustic immittance.

SHS 555 Cochlear Implants (3 credits) This course covers the research and clinical aspects of cochlear implantation with a focus on the principles of speech coding strategies. Prerequisites: instructor approval.

SHS 580 Clinical Practicum (in Audiology) (2 to 6 credits) Supervised observation and clinical experiences in audiology. Clinical experiences occur within the ASU Speech and Hearing Clinic and affiliated programs. May be repeated for credit. Prerequisites: instructor approval; student must not have provisional admission status.

SHS 584 Internship (in Audiology) (1 to 6 credits) Off-campus directed clinical experiences in audiology. May be repeated for credit. Prerequisites: SHS 580; student must consult with coordinator before registration.

SHS 589 Audiology Grand Rounds (1 credit) Grand Rounds bridges clinical and academic knowledge through case studies, application of emerging research, and clinical workshops. Prerequisites: SHS 502, or instructor approval.

SHS 590 Audiology Clerkship (15 credits) The Clerkship is designed to provide students with advanced, intensive clinical experiences within selected audiological facilities. Prerequisites: SHS 584 and approval of faculty coordinator.

Electives (6 credits) Coursework, clinic, research or mentored teaching.

THE ASU SPEECH AND HEARING CLINIC

The Department of Speech and Hearing Science houses the ASU Speech and Hearing Clinic, which provides the campus-based clinical training for the AuD program. Through this clinic, diagnostic and rehabilitative audiology services are provided to the general public on a fee-for-service basis. Graduate AuD students provide the clinical services under direct supervision of the department’s ASHA-certified clinical faculty members. Clinical audiology services include comprehensive diagnostic assessment using behavioral and physiologic measures, dispensing of hearing aids and assistive technology, cochlear implant mapping, and provision of individual and group audologic rehabilitation and therapy services. Clinical populations include toddlers, preschoolers, school-aged children, adults, and developmentally delayed and multiply-handicapped persons.

CLINICAL TRAINING REQUIREMENTS FOR PROFESSIONAL PREPARATION IN AUDIOLOGY

The AuD clinical training program at ASU has been designed such that upon completion, students will have met all the clinical requirements for national certification as audiologists. In addition, they will have met the standard of excellence set for all graduates from the ASU AuD professional training program. The training is designed to maximize students’ employment opportunities upon entry into the professional job market. The clinical placements will provide experience in different clinical settings and with different populations to support the development of a wide range of skills. Off-campus clinical sites are chosen according to the: (a) program goals, (b)
level of the student’s preparation, and (c) student’s interest(s). Participating clinical sites are carefully selected based on their commitment to the: (a) education of AuD students, (b) certification/licensure status of clinical preceptors, (c) quality of facilities and equipment, and (d) variety of broad-based clinical experiences and diverse clinical populations offered. All clinical rotations must have prior approval by the Clinical Externship Coordinator as each site must have a formal affiliation agreement with Arizona State University prior to the placement of audiology students. Off-campus clinical rotation experiences may include: (a) basic and advanced auditory and vestibular system assessment across the life span, (b) hearing amplification across the life span, (c) cochlear implants and other implantable devices across the life span, (d) pediatric and adult audiologic rehabilitation, (e) hearing conservation, (f) educational audiology, (g) sedated and intra-operative monitoring using evoked electrophysiological measures, and (h) business practices in audiology.

The clinical component of the AuD program stresses the importance of students first gaining exposure, then supervised experience, and eventually independent service provision as they progress through a series of on- and off-campus clinical rotations. All AuD students are required to complete a semester of clinic preparation and observation (SHS 580 Launch to Clinic), a minimum of three on-campus and three off-campus clinical rotations and a 4th year 12-month Audiology Clerkship (externship). By definition, a clinical rotation is a short-term training experience (one semester) whereas an externship is a long-term training experience (9-12 months). To be recommended for Clinical Certification in Audiology to ASHA, a student must accumulate a minimum of 1820 hours of supervised clinical practicum sufficient in depth and breadth to achieve the knowledge and skills outcomes stipulated in the ASHA 2012 standards.

Table 3 lists the required clinical rotations to be completed during the AuD program. During the first semester of the AuD program, students observe in the Department’s Speech and Hearing Clinic and attend a Launch-to-Clinic seminar designed to prepare students for their first clinical on-campus rotation. Beginning the 2nd semester, students spend a minimum of three semesters in university-based clinical rotations at the department’s Speech and Hearing clinic (SHS 580), under the supervision of ASU clinical faculty. During the first or second semester of the second year, students continue their training in off-campus clinical rotations. Some students may be required to enroll in an additional on-campus clinical rotation until they are judged to be ready for an external clinical site. AuD students will have the option to either complete an additional off-campus clinical rotation (SHS 584) during their third year or they may elect to enroll in research experience (SHS 592) or take elective coursework. During the fourth year, the student will complete a full-time residency placement for 9-12 months in an approved regional or national facility. Registration for the Audiology Clerkship (SHS 590) is for 3-credit hours for one summer session and 6-credit hours each in the fall and spring semesters. If needed to satisfy financial aid requirements, students may distribute the 15 credits for the Audiology Clerkship equally across the summer, fall, and spring semesters (5 credits each). The department’s Clinical Externship Coordinator will facilitate the Audiology Clerkship for each student.

All students will complete a set of required clinical components. Please note that there are academic course prerequisites for certain rotations (e.g., hearing aids, balance assessment, and pediatrics). In some instances,
students will be allowed to take a required course while simultaneously completing the corresponding rotation. On-campus clinical rotations must be completed prior to off-campus clinic rotations. Students must receive a grade of B- or better for satisfactory completion of each on-campus clinical rotation. A grade of A- or better in their final on-campus placement is required before being allowed to advance to off-campus clinic placements. Students are obligated to fulfill each of their clinic responsibilities throughout the semester. There are no provisions for a student to withdraw from a clinical rotation unless clinical performance is unsatisfactory or it is in the best interest of the client(s). In those cases, student may be assigned to a different preceptor or required to repeat the clinical rotation. Additional factors for withdrawal may be considered by the clinical supervisor/preceptor in consultation with the department’s Clinical Externship Coordinator and Director of the Audiology Clinic.

Any student who fails or withdraws while failing a clinical rotation assignment must repeat that semester of clinic and will receive no credit for the clinic clock hours accumulated during that semester. A student who does not complete a clinical rotation (receiving grade of “I”) may receive a portion of the clinic clock hours accumulated during that semester. As it is not usually possible to repeat the clinical rotation with the same or similar clients and clinical preceptor, the requirements for removing the "I" will be at the discretion of the clinical professor with the final approval of the Standards Committee. A student who withdraws (“W”) from a clinical rotation usually receives credit for clinic hours if the student was otherwise performing at a passing level up to the date of the withdrawal unless there are extenuating circumstances. This decision is made by the Standards Committee. Following the second instance of unsatisfactory performance (failing or withdrawal while failing) for a clinical practicum, the Standards Committee may recommend withdrawal of a student from the program. Any student found violating the HIPAA federal regulation will receive a failing grade for that semester’s clinical rotation and, depending upon the gravity of the offense, may be dismissed from the program.

Finally, all students must complete 10 hours of hearing screening and 10 hours of speech screening (typically off-campus) at some point during the four-year program. Students who completed speech screening during their undergraduate coursework may petition to transfer those hours. See Transfer of Clinical Hours on page 7.

AUDIOLOGY CLINICAL EMPHASIS

In addition to the required off-campus placements, students may request specific off-campus clinical rotations from the list below based on their clinical interests.

- ENT Private Practice office; all ages
- Private Audiology and Hearing Aid Dispensing Practice; primarily adults
- Educational Audiology; preschool and school-aged children
- Private Hospital; all ages or adults only or children only
- Government Hospital; all ages or adults only or children only
- Outpatient Audiology and Vestibular Clinic; all ages, or primarily adults

Students are free to indicate clinical rotation preferences, and when possible, these preferences will be accommodated. Clinical rotation assignments are requested in the semester prior to the desired registration through the department’s Clinical Externship Coordinator. It is important to note, however, that the primary obligation of the program is to provide a clinical training experience that meets the goals of the training program and ASHA certification and state licensure requirements. Thus, students may be assigned to a clinical rotation placement that was not their first choice.
CLINICAL ROTATION OPPORTUNITIES

The Department has established affiliations with a wide variety of highly reputable local and national audiology facilities that have agreed to provide clinical training to our graduate students. These experiences offer the AuD student comprehensive opportunities for professional skill development with a rich diversity of professionals, clientele, hearing disorders, and clinical methodology. The greater Phoenix metropolitan area offers students clinical placements from a large selection of hospitals, clinics, private practice offices, and educational facilities. The clinic also has affiliations and contracts with several externship sites in the Phoenix metro area and around the U.S. For a current list of internship and externship sites, log in to the Typhon website (described below) or check with the department’s Clinical Externship Coordinator.

DOCUMENTATION OF CLINICAL HOURS AND COMPETENCIES

The Audiology clinical training program uses a web-based student tracking system called Typhon. Students are trained on the Typhon software prior to their first clinical rotation. Students and clinical faculty access the online tracking system using the following URL: www.typhongroup.net/asu with their assigned user login ID and password. The Typhon system provides a comprehensive record of clinical hours and the competency areas in which they have gained experience during each semester’s clinical rotation and during their 4th-year externship. This documentation is necessary for ASHA certification. Please see the Audiology Clinic Policy and Procedures Manual for details.

CLINICAL TIME DEMANDS

Enrollment in clinical rotation places significant time demands on students during the work week. Student clinicians should be prepared to devote approximately 5 to 15 hours per week to the preparation, implementation, and analysis of clinical experiences. Each credit hour represents 45 client contact hours per semester. In a typical 15-week semester, students registering for two credits of SHS 580 are typically in clinic one half day per week and are responsible for the service delivery and reports/chart notes for approximately two to three patients; students registering for three credits of SHS 580 are typically in clinic for one full day per week and are responsible for the service delivery and report/chart notes for approximately four to six patients. During an 8-week summer clinic, students registering for two credits are typically in clinic one full day per week and are responsible for the service delivery and reports/chart notes for approximately four to six patients. Students also participate in one 7-week audiolingual rehabilitation group during the fall, spring, and summer sessions of their first year of on-campus clinical. Students gaining experience at off-campus sites (SHS 584) and registered for 3 credit hours are expected to spend 1.5 to 2 full days per week at their clinical rotation site. During the summer students are expected to spend 2 to 2.5 days per week over the 8-week semester.

PROFESSIONAL AND ETHICAL CONSIDERATIONS FOR CLINIC

All students enrolled in clinical practicum are expected to abide by the ASHA Code of Ethics (http://www.asha.org/policy/ET2010-00309/) and the American Academy of Audiology (AAA) Code of Ethics (http://www.audiology.org/resources/documentlibrary/Pages/codeofethics.aspx). Violations of either Code of Ethics may result in permanent dismissal from practicum placement opportunities, and may additionally subject the student to dismissal from the academic degree program. Additionally, strict adherence to HIPAA guidelines (http://www.hhs.gov/ocr/privacy/index.html) also is essential to protect the confidentiality of our patients. Any student found violating the HIPAA federal regulation will receive a failing grade for that semester’s clinical rotation and, depending upon the gravity of the offense, may be dismissed from the program. It is important to understand that the welfare of the patient is just as important as the training needs of the student. Participation in clinic should be seen as a privilege rather than a right. Clinical practicum students are expected to maintain professional dress and demeanor whenever they are in the clinic rooms or hallways during clinic hours. Unprofessional
conduct, or any conduct which compromises the quality of care to clinic patients, may result in dismissal from clinical rotation placements and from the academic degree program.

The Audiology Clinic Policy and Procedures Manual provides further information regarding policies and procedures for on- and off-campus clinical rotation placements.

**REQUIREMENTS FOR CLINICAL CERTIFICATION**

**FORMATIVE ASSESSMENTS**

As defined by ASHA, a formative assessment is, “an ongoing measurement during educational preparation for the purpose of improving student learning. Formative assessment yields critical information for monitoring an individual’s acquisition of knowledge and skills. Such assessment must evaluate critical thinking, decision-making, and problem-solving skills. Measures should include oral and written components, as well as demonstrations of clinical proficiency.” A series of formative assessments are embedded in the AuD coursework and clinic practica (e.g., SHS 502 Basic Audiometry, SHS 504 Amplification 1, SHS 517 Balance Assessment). Specific ASHA standards covered in the class and behaviorally defined levels of achievement for each knowledge and skill are identified in the course syllabus. A grade of B- or better for all academic courses and clinical experiences is required for graduation and to meet KASA competencies. A list of courses that satisfies each of the KASA competencies is provided in Appendix E.

**SUMMATIVE ASSESSMENT**

As defined by ASHA, “a summative assessment is a comprehensive evaluation of learning outcomes at the culmination of educational preparation. Summative assessment yields critical information for determining an individuals’ achievement of knowledge and skills.” To this end, the ASU AuD program requires passing scores on one summative assessment.

**Praxis Exam**

All students pursuing a doctoral degree and certification in Audiology must earn a minimum passing score as defined by ASHA on the audiology area exam of the National Examination for Speech-Language Pathology and Audiology (NESPA), which is one of the Praxis Series of exams administered by the Educational Testing Service (ETS). Information regarding the Praxis examination in audiology is available at [http://www.ets.org/praxis](http://www.ets.org/praxis). The exam can be taken at any time during the third or fourth year, although many 4th-year sites require evidence of a passing score on the Praxis examination as part of the eligibility requirements for placement.

A passing score must be on file in the Department office in order for processing of final graduation forms to proceed. Approximately 8 weeks should be allowed between the time the examination is taken and scores are received in the Department. Students are, therefore, advised to plan the time at which they will take the exam accordingly.

Students who do not have official Praxis scores on file in the department office are viewed as deficient with regard to completion of graduate requirements and will not be allowed to graduate until such scores are submitted. Students can obtain registration packets for the national examination from the University Testing Service on campus (EDB 302; 480-965-3104). When registering for the test, students must request that scores be sent to the Department of Speech and Hearing Science at Arizona State University and to the American Speech-Language-Hearing Association.
The AuD degree will be awarded upon successful completion of course work, the two formative assessments, clinical practicum, and the National Praxis examination. At the completion of the 4-year program, the Director of the Audiology Clinic, Chair of the AuD Admissions and Program Committee, and the Department Chair, will verify satisfactory completion of degree requirements and the achievement of the required competencies. Upon graduation, students may then apply for ASHA certification. Specific requirements for certification in Audiology may be found in the ASHA Membership Directory, and the ASHA Certification handbook, which may be obtained from the American Speech-Language-Hearing Association, 10801 Rockville Pike, Rockville, MD 20852 [(301) 897-5700]. The requirements also are posted on ASHA’s website at: [http://www.asha.org/certification/](http://www.asha.org/certification/). AuD students should familiarize themselves with the ASHA certification requirements and the ASHA Code of Ethics for clinical practice. These and other important documents are available on the ASHA website at: [http://www.asha.org/aud/](http://www.asha.org/aud/). The LINKS page (Appendix D) also includes other useful sources for AuD students and practicing audiologists.

**REQUIRED DOCUMENTATION**

**STEPS TO GRADUATION - University**

1. File your Plan of Study (iPOS) (this should be done during the second year)
   a. Go to: [www.asu.edu/myasu/](http://www.asu.edu/myasu/) and click My Graduate Plan of Study. Go to: ipos-g@asu.edu if you have questions.
   b. List your advisor, the Director of the Audiology Clinic, and the Chair of AuD Admissions and Program Committee as the members of your committee. The total course credits should equal 95.
   c. Submit the iPOS. The graduate college will notify the student that the iPOS was approved.

2. File for Graduation (end of March)
   a. Pay the graduation fee at Cashiering Services (Student Services Building)
   b. Go to the Graduation Section (Student Services Building, 140) to complete the process. You cannot file for Graduation until your iPOS has been approved.
   c. Deadlines can be found at: [https://graduate.asu.edu/completing-your-degree](https://graduate.asu.edu/completing-your-degree)

**STEPS TO GRADUATION – Department** (Samples of each form are provided in Appendix F.)

1. Clinical Rotation/Externship Outcomes
   a. Have your Clinical Rotation/Externship Outcomes completed (one per site), reviewed and sign by each preceptor upon completion of your case and time logs.
   b. Submit the outcome forms to the Clinical Externship Coordinator.
   c. Be sure that all case and time logs are entered into Typhon and approved by your preceptor.

2. Verify that the department has received your Praxis Exam scores.

3. Complete the AuD Requirements Checklist. Record the semester and year as well as the grade received for each academic course and clinical practicum. An unsatisfactory grade (any grade lower than B-) may not be submitted.

4. Complete and sign your portion of the Verification of AuD Program Completion Form.
   a. Record the score you received on the Praxis exam and date the exam was taken. If the exam was taken more than once, list in order of date (earliest to latest).
   b. From the Typhon Tracking Software, calculate your total clock hours and record that number on the form. A comprehensive summary of your case and time logs will be generated by the Director of the Audiology Clinic and placed in your student file.
5. Print an unofficial copy of your transcript

6. Submit the following to the Graduate Student Support Coordinator:
   a. an unofficial copy of your transcript
   b. Verification of AuD Program Completion Form
   c. AuD Requirements Checklist
   d. any outstanding documents

After receiving your paperwork, your grades and clinical hours will be verified prior to approving your application for graduation with the graduate college. Shortly after, you will receive a signed verification of your clinical competence for certification through ASHA. The full application can be downloaded at http://www.asha.org/Certification/AudCertification.htm. (We will complete the last page and send it to you.)

*Elective may be taken during the summer
APPENDIX B: AUD THIRD-YEAR OPTIONAL MENTORED RESEARCH EXPERIENCE
DESCRIPTION AND EXPECTATIONS

Students in good standing in the AuD program may fulfill their required electives by engaging in research either during the summer semester of their second year or during their third year in the AuD program for one or two semesters. Several levels (Tiers) of research are available to accommodate a range of projects. Interested students must meet with a research mentor to discuss the research options and then complete the AuD Research Mentor Agreement (attached) prior to beginning a project. This form makes clear the student’s and mentor’s responsibilities during the project and the criterion by which the student will be evaluated.

TIER 1
This option is appropriate for students wishing to contribute to an ongoing project or engage in an independent study on a particular topic of research. An appropriate outcome measure for this work would be a short paper (3-5 pages, evaluated by the mentor). The student should enroll in 1 credit of SHS 592 per semester and expect to spend 5-10 hours per week engaged in research (lab and/or literature review) and meet with his/her mentor once per week.

TIER 2
This option is appropriate for students wishing to conduct a small scale project similar to a pilot study developed by the student or the mentor. An appropriate outcome measure of this work would be a paper (10-15 pages, evaluated by the mentor) or a poster presentation in the SHS Research Symposium at the end of the year or at a professional meeting. The student should enroll in 2-3 credits of SHS 592 per semester and expect to spend 10-15 hours per week engaged in research (lab and literature review) and meet with the mentor at least once per week.

TIER 3
This option is appropriate for students considering an AuD-PhD degree. This project is typically a larger, original research study similar to that required by first-year PhD students. The outcome measure of this work is a presentation to the SHS Research Symposium at the end of the year and a manuscript style paper. Please consult the PhD handbook for a detailed description of the requirements. The student should enroll in 3 credits of SHS 592 for at least two semesters (fall, spring, and/or summer) and expect to spend 15+ hours per week engaged in research (lab, literature review, writing). He/she will work directly and regularly with the mentor or his/her representative.

Mentor Responsibilities
It is the responsibility of the mentor to make available the necessary resources and to evaluate student performance throughout the semester. Prior to starting the research, both the student and the mentor should be clear about the expected work load and outcome measures (use the Tiers as a guide). Regardless of the Tier, this research option should be considered by the mentor as equivalent to an independent study (overload).

Student Responsibilities
Students are required to arrange their research experience with a mentor of their choosing. The mentor may be a clinical or academic professor who is qualified and available to provide mentorship for one to two semesters and who has the resources to conduct a research project. Prior to starting the research, both the student and the mentor should be clear about the expected work load and outcome measures (use the Tiers as a guide).

Prior to starting the research project, the student, the faculty, and the Chairperson of the AuD Admissions and Program Committee will sign the Mentored Research Agreement. This form may be obtained from the student’s advisor, research mentor, or the AuD Handbook. The original, signed agreement will be placed in the student’s
academic file. Failure to complete the work or meet agreed expectations can result in an incomplete or failing grade for the research project.
I, _____________________________, accept ______________________________ into my (mentor) laboratory for a Tier (1, 2, or 3 – see attached) ____________ mentored research experience.

In accepting this student into my lab, I agree to: 1) make available the necessary resources for a meaningful research experience, 2) expose him/her to various research methodologies, 3) help him/her develop research skills, and 4) meet with the student on a regular basis at a mutually agreed time. I have discussed with the student the following general and specific expectations:

**General**
- Be committed to a high standard of excellence and integrity in all work performed in the lab.
- Learn independently when possible and seek guidance when needed.
- Be respectful of the time and efforts of all members of the laboratory group.
- Be familiar with and adhere to professional research and ethical guidelines.
- Be respectful of and maintain confidentiality of all research participants.
- Respect the confidentiality of unpublished data/research at all times.
- Attend and be prepared to participate in all lab meetings.

**Specific:**
Description of the research project (area of research, tests to be used, subject population) __________

________________________________________________________________________________________

Expected participation each week (# of hours ____________________________________________________________________________

Start date: __________________________; End date: __________________________

Product of research activities for summative assessment (e.g., paper, presentation/location) __________

________________________________________________________________________________________

I hereby agree to the contents and intent of this Research Mentor Agreement:

Date
APPENDIX B: AUD THIRD-YEAR OPTIONAL MENTORED TEACHING EXPERIENCE
DESCRIPTION AND EXPECTATIONS

Description

Students in good standing in the AuD program may fulfill the required elective for the Spring semester of their third year by engaging in a comprehensive mentored teaching experience. This option is for one semester only and is available to students who have experience as an instructor, lecturer, and/or teaching assistant. Students without prior teaching experience are not eligible. Interested students must meet with the mentor of their choice to discuss the possibility of a mentored teaching experience. The student should enroll in 3 credits of SHS 591 per semester and expect to spend approximately 10 hours per week engaged in the teaching work load. If both parties agree, the AuD Teaching Mentor Agreement Form (attached) must be completed prior to the start of the semester. This form specifies the student’s and mentor’s responsibilities during the semester and the criterion by which the student will be evaluated.

Potential teaching mentors are academic and clinical faculty who are scheduled to teach undergraduate courses in the Speech and Hearing Science Department. Currently, undergraduate courses offered during the spring semester include:

- SHS 311 Physical and Physiological Bases of Hearing (3): Study of the physical characteristics of sound and of the structure and function of the human auditory system.
- SHS 401 Introduction to Audiology (3): Introduction to hearing disorders and the purposes and procedures for basic clinical tests of auditory function.
- SHS 496 Aural Rehabilitation (3): Approaches to aural rehabilitation of children and adults. Introduction to educational audiology and assistive listening devices.

Scope of the Mentorship

The mentored teaching option is designed to equip interested AuD students with the skills necessary to teach courses within their area of interest (Audiology). Mentorship will include (but is not limited to):

- Syllabus design and construction
- Lecture design and construction
- Formal examination design and construction
- Homework design and construction
- Lab/practicum design and construction
- Policies and procedures for formal examinations/papers/practica
- Constructing and implementing grading rubrics
- How to detect and deal with issues of academic integrity
- Class management (small and large classes)
- Professional academic practices
- Public speaking (lectures)
- Blackboard design and management

Mentor Responsibilities

It is the responsibility of the mentor to make available the necessary resources for a valuable teaching experience and to evaluate student performance throughout the semester. Prior to starting the mentorship, both the student and the mentor should be clear about the expected work load and outcome measures.

Important: the student mentee should not be considered a teaching assistant for the course nor should he/she be expected to assume the role of instructor of record. Mentees are expected to attend every class, discuss every lecture, grade exams and/or papers with the mentor, and discuss real or hypothetical events that may
arise during the semester. This mentorship is designed to be a one-on-one experience throughout the duration of the course. This option should be considered by the mentor as equivalent to an independent study (overload).

**Mentee Responsibilities**
It is the mentee’s responsibility to work closely with the mentor to accomplish the goals for the course and the mentored experience. Interested students must meet with potential mentors to determine the student’s candidacy.

*Important: this mentorship is not equivalent to a teaching assistant position. And, it is not a paid position.*

Mentees are expected to attend every class, discuss every lecture, grade exams and/or papers with the mentor, and discuss real or hypothetical events that may arise during the semester. Prior to starting the teaching mentorship, both the student and the mentor should be clear about the expected work load and outcome measures.

Prior to starting the teaching mentorship, the student, the faculty, and the Chairperson of the AuD Admissions and Program Committee will sign the Mentored Teaching Agreement. This form may be obtained from the student’s advisor, teaching mentor, or the AuD Handbook. The original, signed agreement will be placed in the student’s academic file. Failure to complete the work or meet agreed expectations can result in an incomplete or failing grade for the semester.
AuD Mentored Teaching Agreement  
Speech and Hearing Science Department  
Arizona State University

I, ________________________________________, accept ________________________________________ into my  
(mentor)                               (student)  
course (number, semester, year)__________________________ for a mentored teaching experience.

In accepting this student, I agree to: 1) make available the necessary resources for a meaningful teaching  
experience, 2) expose him/her to sound teaching practices, 3) involve him/her in all aspects of the  
course, and 4) meet with the student on a regular basis at a mutually agreed time. I have discussed with  
the student the following general and specific expectations:

General
- Be committed to a high standard of excellence and integrity in all work related to the course.  
- Learn independently when possible and seek guidance when needed.
- Be familiar with and adhere to professional and ethical guidelines (e.g., FERPA).
- Respect the confidentiality of student’s personal information and performance data at all times.
- Attend all lectures/exams/demonstrations, etc., as required by/agree upon with the instructor.

Specific:
- This course meets on: ________________________________________
- Description of the course content (area of instruction, format of the course) ________________  
   ________________________________________________________________
   ________________________________________________________________
- Expected participation each week (# of hours)___________________________________________
   ________________________________________________________________
   ________________________________________________________________

I hereby agree to the contents and intent of this Research Mentor Agreement:

____________________________________________________________________  
Student                      Date                      Mentor                      Date

## APPENDIX D
### AuD KNOWLEDGE AND SKILLS ACQUISITION (KASA)

| Standard 3.3-A for Accreditation: Scientific and Research Foundations of the Profession |
|---------------------------------|---------------------------------|
| Std. 3.3-A: The applicant must have prerequisite skills and knowledge of: |
| • Life Sciences | BIO 201 Human Anatomy & Physiology Variable |
| • Physical Sciences | PHY 101 Intro. To Physics Variable |
| • Behavioral Sciences | PGS 101 Intro to Psychology Variable |
| • Mathematics | MAT 170 Pre-calculus |
| | PSY 230 Intro to Statistics Variable |
| • Hearing Science | SHS 311 Physical and Physiological Bases of Hearing |
| | SHS 401 Introduction to Audiology |
| • Speech/Language Science | SHS 310 Anatomical and Physiological Bases of Speech Language Science |
| | SHS 367 Speech and Language Acquisition |
| | SHS 465 Speech Science |
| | SHS 375 Acquired Speech and Language Disorders |
| Standard IV-A Foundations of Practice: |
| A1. Embryology and development of the auditory and vestibular systems, anatomy and physiology, neuroanatomy and neurophysiology, and pathophysiology. |
| SHS 508 Pediatric Audiology |
| SHS 513 Neurophysiology of the Auditory System |
| SHS 516 Auditory Evoked Potentials |
| SHS 517 Balance Assessment |
| SHS 520 Auditory Pathologies, Disorders & Otoneurologic |
| SHS 552 Physiological Measures of Auditory Function |
| A2. Genetics and associated syndromes related to hearing and balance |
| SHS 508 Pediatric Audiology |
| SHS 520 Auditory Pathologies, Disorders & Otoneurologic |
| A3. Normal aspects of auditory physiology and behavior over the life span |
| SHS 502 Basic Audimetry |
| SHS 508 Pediatric Audiology |
| SHS 511 Auditory Perception by the Hearing Impaired |
| SHS 513 Neurophysiology of the Auditory System |
| SHS 523 Advanced Audimetry |
| SHS 552 Physiological Measures of Auditory Function |
| A4. Normal development of speech and language |
| SHS 465 Speech and Language Acquisition |
| SHS 508 Pediatric Audiology |
| A5. Language and speech characteristics and their development across the life span. |
| SHS 465 Speech and Language Acquisition |
| SHS 508 Pediatric Audiology |
| SHS 511 Auditory Perception by the Hearing Impaired |
| A6. Phonologic, morphologic, syntactic, and pragmatic aspects of human communication associated with hearing impairment |
| SHS 465 Speech and Language Acquisition |
| SHS 508 Pediatric Audiology |
| SHS 518 Auditory Rehabilitation |
| SHS 520 Auditory Pathologies, Disorders & Otoneurologic |
| A7. Effects of hearing loss on communication and educational, vocational, social, and psychological functioning. |
| SHS 502 Basic Audimetry |
| SHS 504 Amplification I |
| SHS 508 Pediatric Audiology |
| SHS 510 Amplification II |
| SHS 518 Auditory Rehabilitation |
| SHS 524 Counseling for the hearing impaired |
| SHS 589 Audiology Grand Rounds |
| A8. Effects of pharmacologic and teratogenic agents on the auditory and vestibular systems |
| SHS 508 Pediatric Audiology |
| SHS 513 Neurophysiology of the Auditory System |
| SHS 516 Auditory Evoked Potentials |
| SHS 517 Balance Assessment |
| SHS 520 Auditory Pathologies, Disorders & Otoneurologic |
| A9. Patient characteristics (e.g., age, demographics, cultural and linguistic |
| SHS 502 Basic Audimetry |
| SHS 504 Amplification I |
| A10. Pathologies related to hearing and balance and their medical diagnosis and treatment. | SHS 508 | Pediatric Audiology |
| SHS 510 | Amplification II |
| SHS 517 | Balance Assessment |
| SHS 518 | Auditory Rehabilitation |
| SHS 520 | Auditory Pathologies, Disorders & Otoneurologic |
| SHS 523 | Advanced Audimetry |
| SHS 589 | Audiology Grand Rounds |

| A11. Principles, methods, and applications of psychometrics. | PSY 230 | Introduction to Statistics |
| SHS 500 | Research Methods |
| SHS 589 | Audiology Grand Rounds |

| A12. Principles, methods, and applications of psychoacoustics | SHS 311 | Physical/Physiological Bases of Hearing |
| SHS 511 | Auditory Perception by the hearing impaired |

| A13. Instrumentation and bioelectrical hazards. | SHS 502 | Basic Audimetry |
| SHS 504 | Amplification I |
| SHS 510 | Amplification II |
| SHS 516 | Auditory Evoked Potentials |
| SHS 517 | Balance Assessment |
| SHS 522 | Hearing Conservation/Instrumentation |
| SHS 552 | Physiologic Measures of Auditory Function |

| A14. Physical characteristics and measurement of electric and other nonacoustic stimuli | SHS 516 | Auditory Evoked Potentials |
| SHS 517 | Balance Assessment |
| SHS 522 | Hearing Conservation/Instrumentation |
| SHS 552 | Physiological Measures of Auditory Function |
| SHS 555 | Cochlear Implants |

| A15. Assistive technology. | SHS 510 | Amplification II |
| SHS 518 | Auditory Rehabilitation |

| A16. Effects of cultural diversity and family systems on professional practice. | SHS 508 | Pediatric Audiology |
| SHS 518 | Auditory Rehabilitation |
| SHS 524 | Counseling in Communication Disorders |

| A17. American Sign Language and other visual communication systems. | SHS 505 | Survival Sign Language |
| SHS 518 | Auditory Rehabilitation |

| A18. Principles and practices of research, including experimental design, statistical methods, and application to clinical populations. | PSY 230 | Introduction to Statistics |
| SHS 500 | Research Methods |
| SHS 589 | Grand Rounds |

| A19. Legal and ethical practices (e.g., standards for professional conduct, patient rights, credentialing, and legislative and regulatory mandates). | SHS 504 | Amplification I |
| SHS 525 | Audiology Practice Management |
| SHS 589 | Audiology Grand Round |
| SHS 580 | Launch to Clinic |

| A20. Health care and educational delivery systems | SHS 508 | Pediatric Audiology |
| SHS 525 | Audiology Practice Management |
| SHS 589 | Audiology Grand Rounds |
| SHS 580 | Launch to Clinic |

| A21. Universal precautions and infectious/contagious diseases. | SHS 502 | Basic Audimetry |
| SHS 504 | Amplification I |
| SHS 525 | Audiology Practice Management |
| SHS 589 | Audiology Grand Rounds |
| SHS 580 | Clinical Practicum |

| A22. Oral and written forms of communication. | SHS 502 | Basic Audimetry |
| SHD 589 | Audiology Grand Rounds |
| SHS 580 | Launch to Clinic |

<p>| A23. Principles, methods, and applications of acoustics (e.g., basic parameters of sound, principles of acoustics as related to speech sounds, sound/noise measurement and analysis, and calibration of audiometric equipment), as applicable to: | SHS 508 | Pediatric Audiology |
| SHS 510 | Amplification II |
| SHS 518 | Auditory Rehabilitation |
| SHS 522 | Hearing Conservation/Instrumentation |
| SHS 589 | Audiology Grand Rounds |
| SHS 580 | Clinical Practicum |
| SHS 584 | Clinical Internship |
| SHS 590 | Audiology Clerkship |</p>

SHS 584 Clinical Internship  
SHS 590 Audiology Clerkship |
| **F4.** Administering clinical programs and providing supervision of professionals as well as support personnel. | SHS 525 Audiology Practice Management  
SHS 589 Audiology Grand Rounds | SHS 580 Clinical Practicum  
SHS 584 Clinical Internship  
SHS 590 Audiology Clerkship |
| **F5.** Identifying internal programmatic needs and developing new programs. | SHS 525 Audiology Practice Management  
SHS 589 Audiology Grand Rounds | SHS 580 Clinical Practicum  
SHS 584 Clinical Internship  
SHS 590 Audiology Clerkship |
| **F6.** Maintaining or establishing links with external programs, including but not limited to education programs, government programs, and philanthropic agencies. | SHS 508 Pediatric Audiology  
SHS 518 Auditory Rehabilitation | SHS 580 Clinical Practicum  
SHS 584 Clinical Internship  
SHS 590 Audiology Clerkship |
APPENDIX E
SAMPLE FORMS TO BE SUBMITTED
FOR GRADUATION
AND FOR
ASHA CERTIFICATION

These forms should be downloaded from the
Department Blackboard Site:
SHS Student Resources/Audiology
VERIFICATION OF AuD PROGRAM COMPLETION – SAMPLE

Student Name: _______________________________ Semester/Year Completed: ____________________________

Student completes items 1 through 4. Shaded sections are for administrative use only.

1. **National Praxis Examination.** Record the date(s) that you took the Praxis exam and the score(s) received. Official scores must be submitted to the department directly from ETS.

   Date: ________ Score: ___________ □ Passed □ Failed
   Date: ________ Score: ___________ □ Passed □ Failed
   Date: ________ Score: ___________ □ Passed □ Failed

2. **Clinical clock hours.** Calculate and record below the total clinical clock hours earned.

   Date: ________ Total Hours: ____________

3. **AuD Requirements Summary Checklist.** Record the semester/year and the grade received for each academic course and clinical practicum. An unsatisfactory grade (lower than B-) may not be submitted.

   By signing below I confirm that the information provided on this form and the attached forms is accurate.

   ___________________________________________ __________________________
   Student Signature Date

4. **Clinical Clock Hours Form.** (To be completed by Director of the Audiology Clinic)

5. **Knowledge and Skills Acquisition (KASA) Summary Form for Certification.** (To be completed by AuD Admissions and Program Committee Chair)

   Signatures:

   ___________________________________________ __________________________
   AuD Admissions and Program Committee Chair Date

   ___________________________________________ __________________________
   Audiology Director of the Audiology Clinic Date

   ___________________________________________ __________________________
   Department Chair Date
Arizona State University  
AuD Requirements Summary Checklist

Student Name: ___________________________  Semester/Year Admitted: ________________

Advisor: ___________________________  Semester/Year Completed: ________________

From your transcript, record the semester and year (e.g., S2014) as well as the grade received for each of the courses and clinical practicum listed below. If a course was taken (must have been pre-approved by your advisor) in lieu of a listed course, write the course and grade in a blank space below.
