I. INTRODUCTION

Lifestyle-related chronic diseases now account for 70% of all U.S. deaths and 75% of U.S. health care expenditures, yet on average <1% of total lecture hours in medical school teach nutrition and fewer than 14% of physicians believe they were adequately trained in nutritional counseling. The MS in Medical Nutrition will directly address the national shortfalls in medical nutrition education and provide current and future health care professionals with formal training on diet strategies for health promotion and health maintenance.

Current and future health care professionals are ideal candidates for this program, including "gap year" students, i.e., those who have completed their bachelor's degree but have not yet secured admission to medical, veterinary, dental, osteopathic, physician assistant or similar schools. Additionally, current medical students, residents, fellows, and practitioners (MD, DO, PA, DVM, DDS, etc.), seeking to develop a strong knowledge base in the nutritional sciences and its application in the health care field would also benefit from the MS Medical Nutrition program.

Students in this program develop competence in nutritional biochemistry and its application in health maintenance, the treatment of disease, and disease prevention. Coursework and culminating experiences integrate training in therapeutic diets, nutrition guidelines, and supplement as well as functional food usage for optimal health. The program emphasizes self-directed learning using evidence-based nutrition research, and students develop interpretive expertise and nutritional assessment techniques to use in clinical practice. Proficiency in reading and interpreting nutrition research is another key program goal, and ensures graduates are well versed in the importance of making recommendations grounded in evidence-based practice.
II. MS MEDICAL NUTRITION

A. Prerequisites for Graduate Study in Medical Nutrition
   - BS/BA degree with a minimum of a 3.0 GPA in the last 60 hours of coursework
   - GRE scores (may be replaced with MCAT, DAT, etc on case-by-case basis)
   - One Page Personal Statement & Three Letters of Recommendation

C. Admission Procedures for MS in Medical Nutrition Program

Admission to Graduate Study
Applicants to the Medical Nutrition program must send application materials to ASU Graduate Admission.

At a minimum, applicants to the Medical Nutrition program are expected to meet GPA requirements as established by ASU Graduate Education.

Nutrition Program Requirements
In addition to the online application submitted to Graduate Education, applicants to the Medical Nutrition program must include the following supplemental information:

- Three letters of recommendation
- A one- to two-page, typed, double-spaced, personal statement addressing the following:
  - significant professional responsibilities you have held; your professional goals and reasons for desiring to enroll in this program; strengths that will help you succeed in this program and in reaching your professional goals; and your personal interests in research, including, if applicable, studies involving the practice of dietetics.

Processing of Applications
Please see the ASU Online website for current deadlines for ASU Online students.

Credentials submitted by applicants to the MS in Medical Nutrition are evaluated by ASU Graduate Admissions and the Nutrition Program Graduate Committee. To ensure consideration for admission, all application materials should be received by the priority deadline of \textbf{July 20th} for fall admission. After these priority deadlines pass, a rolling admission will apply. If deadline dates fall on a weekend, then the deadline will be the first business day (typically Monday) after that date. Based upon the recommendation of the Graduate Committee, applicants will be recommended for admission to ASU Graduate Admissions by the Director of the Medical Nutrition Graduate Program.

Notification of admission to the graduate program is usually given within two weeks of the application review.

Admission and Denial Criteria
No single criterion will serve as a basis for admission or denial to the Medical Nutrition. Criteria for admission include:

1. Evidence of outstanding scholarship from previous academic record.
2. Favorable letters of recommendation commenting on the applicant’s academic and professional qualifications for graduate study.
3. Professional goals compatible with the Medical Nutrition course offerings.
4. Scholarly interest compatible with one or more of the faculty who are active in this degree program.

The decision of the committee will be one of the following:
1. **Regular admission** - Granted when the applicant’s file is complete; the applicant meets criteria of adequate academic preparation, satisfactory and competitive undergraduate grade point average, favorable letters of recommendation, etc.; and, when enrollment limits have not been met.

2. **Denied admission** - When the applicant does not meet the necessary criteria for admission; the applicant does not rank sufficiently high to be selected for the available slots; it is deemed that departmental program fails to match the applicant’s needs, goals, and interests; or no suitable faculty advisor is available.

D. **Applied Project**

**General Procedures**
In addition to planning a program of course work, graduate students also must complete an Applied Project. The Applied Project consists of original work on a specific research or practice problem. The problem is decided upon by the student in consultation with their Applied Project Mentor. Students will select a topic and begin work on it during NTR 593 “Applied Project, Part 1” with the guidance of their Applied Project Mentor and the NTR 593 Instructor. Students will complete the Applied Project near the end of their graduate program, during NTR 593 “Applied Project, Part 2.

**Selection of Applied Project Mentor**
Students should begin the process of selecting an Applied Project Mentor during the first semester of their graduate program. The Applied Project Mentor is established at the initiative of the student, in consultation with the faculty member, and is approved by the Program Director. See Appendix A.

E. **MS in Medical Nutrition Plan of Study Approval of Plan of Study**
The Medical Nutrition Plan of Study (iPOS) should be thoughtfully and carefully planned with their mentor so that it meets the goals and objectives of the program and the student. Each student selects courses after consultation with their advisor. The Plan of Study should be completed and approved by the mentor and the Program Director no later than the time the student has enrolled in 15 credit hours. A Plan of Study must have exactly 30 credit hours, no more and no less. Acceptance of the proposed Plan of Study must be verified by the Program Director. After approval at the program level, the Plan of Study is submitted to ASU Graduate Education for final approval.

**NOTE:** all new Plans of Study have to be submitted online using the Interactive Plan of Study (iPOS) form available through each student’s My ASU account.

**Changes in Plan of Study**
Necessary changes can be initiated and petitioned by the student. The changes must be pre-approved by the Nutrition Program Director, and ASU Graduate Education.

**Performance Reviews** Master’s students are required to maintain a 3.0 cumulative GPA in graduate school, iPOS and all graduate coursework. If the cumulative GPA falls below 3.0, the
student will receive a deficiency notice from the Graduate Committee and be required to raise the cumulative GPA to 3.0 the following semester. If the student fails to raise the cumulative GPA to 3.0 within the allotted time, the student may be dropped from the program. Students completing work for a course in which they received a grade of “I” must maintain continuous enrollment. **Graduate students have one year to complete work for an incomplete grade**; if the work is not completed and the grade changed within one year, the “I” grade becomes permanent. Additional information regarding incomplete grades can be found here. In addition, a student cannot accumulate more than two incompletes at any given time while completing the graduate program of study.

All graduate students admitted to the Medical Nutrition program are subject to the general standards of academic good standing of ASU. However, academic standards do not necessarily guarantee that a student will graduate from the program. Because students obtaining a Master's degree from the Nutrition Program are often placed in positions dealing with the public, they must also demonstrate the requisite qualifications for successful professional performance, including interpersonal skills, basic communication skills, appropriate professional conduct, and satisfactory performance in field experiences. Graduate students who demonstrate behaviors or characteristics that make it questionable that they can succeed professionally will be reviewed by the Nutrition Program Graduate Committee. The committee’s review may result in a decision to disqualify the student or to specify conditions under which continued enrollment is permitted (e.g., probation). Students who wish to appeal the decision of the Nutrition Program Graduate Committee may do so in writing to the Dean of ASU Graduate Education. Any exceptions to these policies and procedures must be approved by the Nutrition Program Graduate Committee.

Once admitted to a graduate degree program or graduate certificate program, students must be registered for a minimum of one credit hour during all phases of their graduate education, including the term in which they graduate. This includes periods when students are engaged in research, conducting a doctoral prospectus, working on or defending theses or dissertations, taking comprehensive examinations, taking Graduate Foreign Language Examinations, or in any other way utilizing university resources, facilities or faculty time.

Registration for every fall semester and spring semester is required. Summer registration is required for students taking examinations, completing culminating experiences, conducting a doctoral prospectus, defending theses or dissertations, or graduating from the degree program.

To maintain continuous enrollment the credit hour(s) must:

- Appear on the student’s *Plan of Study*, OR
- Be research (592, 792), thesis (599), dissertation (799), or continuing registration (595, 695, 795), OR
- Be a graduate-level course

Grades of “W” and/or “X” are not considered valid registration for continuous enrollment purposes. “W” grades are received when students officially withdraw from a course after the drop/add period. “X” grades are received for audit courses. Additionally, students completing work for a course in which they received a grade of “I” must maintain continuous enrollment as
defined previously. Graduate students have one year to complete work for an incomplete grade; if the work is not complete and the grade changed within one year, the “I” grade becomes permanent. Additional information regarding incomplete grades can be found at asu.edu/aad/manuals/ssm/ssm203-09.html.

III. FINANCIAL SUPPORT

A. University Financial Aid
Information regarding financial assistance opportunities is available through Graduate Education.

IV. TIMELINES

A. Calendar for Applying to Nutrition Graduate Program

<tr>
<td>5. Apply for graduation.</td>
<td>During last semester of graduate program</td>
</tr>
</tbody>
</table>

Courses and Applied Project must be completed within six [6] years of enrollment in the first course listed on the Plan of Study.

Faculty in the Department of Nutrition are typically on an academic-year contract, meaning they are on salary only from the beginning of the fall semester through the end of the spring semester. Some faculty may receive summer funding through research grants or for teaching summer session courses. **Proposal meetings, Results meetings, and Applied Project defenses should not be scheduled during the summer unless there is confirmation of the availability of all committee members well in advance of the scheduled date.**
APPENDIX A

Interests of NTR MS Applied Project Nutrition Faculty

Christy Alexon, PhD, RD (calexon@asu.edu) – Functional foods for managing chronic disease, macro/micronutrient metabolism, obesity/diabetes, nutrition education/counseling

Christina Barth, MS, RD (Christina.Barth@asu.edu) -- Eating disorders, sports nutrition, weight management, child nutrition, women’s health, yoga therapy, integrative healthcare

Michael Collins, DC, BS (Michael.Collins.4@asu.edu) -- Sports performance/human performance

Kathleen Dixon, MEd, RD (Kathleen.Dixon@asu.edu) -- Food service management, pediatric dietetics, nutrition counseling

Shauna Grant, MS, RD (Shauna.Grant@asu.edu) – Nutrition support, clinical nutrition, counseling and education, metabolic effects of sedentary lifestyles

Karen Gregory-Mercado, PhD, MPH, MCHES, CWWPM (Karen.Gregory-Mercado@asu.edu) – Health education and promotion, worksite wellness, health and wellness coaching.

Traci Grgich, MS, RD, SNS, CP-F (Traci.Grgich@asu.edu) -- Food service management, food safety, child nutrition/school lunch programs, pediatric nutrition, and pediatric diabetes management.

Teresa Hart, PhD (Teresa.Abraham@asu.edu) – Physical activity, sedentary behavior, and health

Melinda Johnson, MS, RD (Melinda.Duff@asu.edu) -- Nutrition and Media, Nutrition Communications, breastfeeding/lactation, prenatal nutrition, child nutrition, family feeding dynamics

Jessica Lehmann, MS RDN (Jessica.Lehmann@asu.edu) – Nutrition communications, healthy cuisine, child nutrition

Simin Levinson, MS, RD (Simin.Levinson@asu.edu) -- Sports nutrition, foodservice management, weight management, nutrition in wellness

Sandra Mayol-Kreiser, PhD, RD (Sandra.Mayol-Kreiser@asu.edu) -- Clinical nutrition, nutrition support, and nutrition through the lifecycle

Mary McMullen, MS, RD (Mary.McMullen@asu.edu) – Prenatal, infant, child nutrition and breastfeeding/lactation (WIC), Medical Nutritiontherapy, renal nutrition, restrictive eating

Michelle Miller, MS, RD (Michelle.J.Miller@asu.edu) -- Medical Nutritiontherapy, community nutrition and education programs, nutrition counseling, breastfeeding/lactation

Lisa Morse, MS, RD, CNSC (Lisa.M.Morse@asu.edu) -- Nutrition Support, Burns, Trauma, Clinical Nutrition (all topics)

Julia Pearl, MS (Julia.Pearl@asu.edu) – General aspects of healthcare delivery- the triple aim, fitness, physical activity, weight training, yoga, stress management, holistic health, wellness coaching/consulting, group fitness teaching/instruction to all levels and ages ranging from 5-85 years old, marketing of fitness programming in various environments such as commercial gyms/country clubs/spas/corporate wellness, independent studio ownership, speaking and presentation skills to various audiences
Lauren Savaglio, MS, EMT (Lauren.Savaglio@asu.edu) -- Public health, environmental health, preventable health in vulnerable populations, bioethics, veterans’ health, nutritional outcomes of children with HIV-positive mothers, neuropathy and HIV infection.

Christina Scribner, MS, RD, CSSD, CEDRD (Christina.Scribner@asu.edu) – Nutrition therapy for weight related concerns and eating disorders; nutrition and substance abuse, female athlete triad, low energy availability among athletes, nutrition for athletic performance, pediatric and adolescent nutrition, and nutrition for general wellness

Christina Shepard, MS, RDN (Tina.Shepard@asu.edu) -- Nutrition education of the public and the health practitioner; nutrition and dietetic career education; weight control and childhood obesity issues

Note: Other research faculty in the Nutrition Program may also serve as Applied Project mentors or Committee members: Meg Bruening, PhD, MPH, RD; Carol Johnston, PhD, RD; Eric Hekler, PhD; Punam Ohri-Vachaspati, PhD, RD; Karen Sweazea, PhD; Natasha Tasevska, MD, PhD; Sonia Vega Lopez, PhD; Christopher Wharton, PhD; and Corrie Whisner, PhD.

Non-tenure-track faculty can also serve on thesis committees.
